

## ADDENDUM

### Senator Robert F. Bennett Appropriation Disclosure Requirements Fiscal Year 2010

---

Under the new disclosure requirements announced at the beginning of the 111<sup>th</sup> Congress by the Senate and House Appropriations Committees, all Members of Congress are required to post on their websites each appropriations request they submit to the respective subcommittees. The information must include an explanation of the project, a justification for the request, and the requesting entity.

Senator Bennett is requiring any entity seeking federal funding to sign, date, and return this form to his office by April 6, 2009. By signing below, the requesting entity acknowledges that each Fiscal Year 2010 Appropriations Request form submitted to Senator Bennett's office, along with this addendum, will be posted on the senator's website in compliance with the new practice of the committee, and will therefore be available to the public. By signing this addendum, the requesting entity also acknowledges that the corresponding appropriations request is a priority for the city, county, council, or other organization that it represents. Each request will continue to be thoroughly reviewed by Senator Bennett's office and by the staff of the Appropriations Committee.

Going forward, Senator Bennett will continue to work to represent Utah's interests by ensuring Utah's priorities are adequately represented with congressionally directed spending.

Note: A signed addendum must be returned for **each appropriations request submitted** for Fiscal Year 2010.

Project Name: Robotic Platform Advanced Detectors (RPAD) for Continuous, Real-time Monitoring of Chemical, Radiological, and Nuclear Threats

Head of the organization making request: Name: Morgan Taylor

Title: President

Signature: 

Date: April 2<sup>nd</sup>, 2009

## Senator Robert Bennett FY2010 Defense Authorization and Appropriation Request Form

If submitting multiple requests:	Priority #	2	of	2
----------------------------------	------------	---	----	---

Date:	January 30 <sup>th</sup> , 2009
-------	---------------------------------

Company/organization:		VPI Engineering			
Address where majority of the work is to be performed:		11814 S. Election Rd., Suite 200			
City:	Draper	State:	UT	Zip:	84020
Corporate point of contact:	Morgan Taylor				
Phone:					
Lobbyist point of contact:					
Phone:		Email:			

Project name:		Robotic Platform Advanced Detectors (RPAD) for Continuous, Real-time Monitoring of Chemical, Radiological, and Nuclear Threats			
Is this a request for an appropriation, authorization, or both?		Appropriation			
Proposed funding agency:		Army Research Laboratory			
Account:	Army RDT&E, R-1 Line 179	Budget line number [from DoD exhibit O-1, P-1, or R-1]:			
Line title:	RDT&E Management Support	Program Element number:	0708045A		
Is this project funded in the President's budget request? (Yes or No):		No	If yes, amount:	\$	
Funding request:		<b>\$1,500,000</b>			
Is the project in a Service Chief's Unfunded Priority or Unfunded Requirements List? (Yes or No):		No			
If yes, ranking:		Amount:	\$		

DoD or service program manager:		Victor K. Champagne		Phone:	
Office name:	Advanced Materials & Processing Team US Army Research Laboratory		Email:		
Other DoD point of contact/advocate:				Phone:	
Office name:			Email:		

Purpose of project (limit to 250 words) and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

Based on the Army's vision, as outlined in the 2008 Army Modernization Strategy, of employing focused defense against Chemical, Radiological, and Nuclear (CRN) threats, the Army desires to design and build a distributed network of low-cost advanced CRN detectors capable of being integrated into currently deployed and in-development manned and unmanned vehicle platforms resulting in the Robotic Platform Advanced Detector (RPAD) system.

The RPAD program will build upon recent advancements in chemical and radiological detection technologies, allowing existing vehicle and robotic platforms to monitor for CRN threats without interfering with their primary mission. The RPAD system provides a low-cost method of greatly expanding the CRN detection capabilities of the Army's forces. Almost all military platforms could be integrated with RPAD monitors.

The RPAD program addresses the core requirement of the CRN defense outlined in the 2008 Army Modernization Strategy through development of advanced, state-of-the-art detectors optimized for continuous, real-time operation on manned and unmanned robotic vehicle platforms. This program will provide a full-spectrum monitoring solution for CRN threats, providing Battle Command enhanced capabilities to detect, respond, and counter potential CRN threats with faster detection, improved identification, and more efficient planning and deployment of resources.

The US Army is interested in developing RPAD through the research and development of technology related to rugged, low-cost, real-time monitoring of Chemical, Radiological, and Nuclear threats. The DOD FY2010 budget request will provide RDT&E funding for research, prototyping, testing, and evaluation for technology transition.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

No

Proposed bill and/or report language requested:

Robotic Platform Advanced Detectors (RPAD) for Continuous, Real-time Monitoring of Chemical, Radiological, and Nuclear Threats

Please list industry, academic, and government partners:

Will this request be submitted to other Senate or House offices? If so, please list:

Senator Orrin Hatch

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

Has funding previously been requested for this project?	No
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

Budget: \$1,500,000 VPI Engineering, Draper, UT 84020

ADDENDUM

Senator Robert F. Bennett Appropriation Disclosure Requirements  
Fiscal Year 2010

---

Under the new disclosure requirements announced at the beginning of the 111<sup>th</sup> Congress by the Senate and House Appropriations Committees, all Members of Congress are required to post on their websites each appropriations request they submit to the respective subcommittees. The information must include an explanation of the project, a justification for the request, and the requesting entity.

Senator Bennett is requiring any entity seeking federal funding to sign, date, and return this form to his office by April 6, 2009. By signing below, the requesting entity acknowledges that each Fiscal Year 2010 Appropriations Request form submitted to Senator Bennett's office, along with this addendum, will be posted on the senator's website in compliance with the new practice of the committee, and will therefore be available to the public. By signing this addendum, the requesting entity also acknowledges that the corresponding appropriations request is a priority for the city, county, council, or other organization that it represents. Each request will continue to be thoroughly reviewed by Senator Bennett's office and by the staff of the Appropriations Committee.

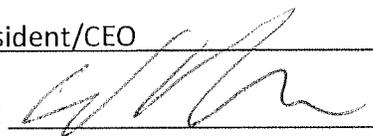

Going forward, Senator Bennett will continue to work to represent Utah's interests by ensuring Utah's priorities are adequately represented with congressionally directed spending.

Note: A signed addendum must be returned for **each appropriations request submitted** for Fiscal Year 2010.

Project Name: Sensor and Array Cost/Performance Improvement for Deployable Autonomous Distributed System (DADS)

Head of the organization making request: Name: Walter P. Kitonis, Progeny Systems Corporation

Title: President/CEO

Signature:  \_\_\_\_\_

Date: 25 March 2009

## Senator Robert Bennett FY2010 Defense Authorization and Appropriation Request Form

If submitting multiple requests:	Priority	1	of	1
----------------------------------	----------	---	----	---

Date:	24 February 2009
-------	------------------

Company/organization:		Progeny Systems Corporation			
Address where majority of the work is to be performed:		49 East Gallivan Avenue P.O. Box 652			
City:	Salt Lake City	State:	UT	Zip:	84110
Corporate point of contact:		Walter P. Kitonis			
Phone:					
Lobbyist point of contact		Grayson Winterling, Congressional Strategies, LLC			
Phone:					

Project name:		Sensor and Array Cost/Performance Improvement for Deployable Autonomous Distributed System (DADS)			
Is this a request for an appropriation, authorization, or both?		Both			
Proposed funding agency:		U.S. Navy			
Account:	RDTEN	Budget line number [from DoD exhibit O-1, P-1, or R-1]:		23	
Line title:		Undersea Warfare Advanced Technology, Project 2916		Program Element number:	0603747N
Is this project funded in the President's budget request? (Yes or No):		No	If yes, amount:	\$	
Funding request:		\$ 3.0M			
Is the project in a Service Chief's Unfunded Priority or Unfunded Requirements List? (Yes or No):		Yes, on the CNO's FY09 UPL			
If yes, ranking:	#6	Amount:	\$ 41.2M		

DoD or service program manager:		Mr. William Macha, DADS Program Manager		Phone:	
Office name:	SPAWAR Systems Center		Email:		
Other DoD point of contact/advocate:				Phone:	
Office name:			Email:		

Purpose of project (limit to 250 words and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

The current DADS acoustic sensor is a conventional piezoelectric ceramic omni-directional hydrophone. The number of conventional sensors required to meet performance requirements take up too much space in the DADS sensor node and still do not fully meet the acoustic

performance requirements. Progeny will address the need of the DADS Program for an improved acoustic sensor to meet requirements and reduce system cost by leveraging its proven single crystal, directional vector sensor technology being adapted for DADS application under SBIR N08-216 (Progeny contract N65538-09-M-0041). This higher performance directional acoustic sensor approach will provide acoustic detection and directional sensing in a much smaller form factor that fits within the space budget of the DADS sensor node and which reduces cost and the number of sensors required per array. The Navy has identified the need for a directional acoustic sensor that will fit within the demanding packaging size requirements while improving acoustic performance and in doing so reduce the number and cost of sensors required for the DADS array compared to the omni-directional legacy sensor currently used in DADS.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

This effort addresses the CNO's Priority #6 Fiscal 2009 Navy Unfunded Programs List: "Anti-Submarine Warfare (ASW) Enhancements List - Enhancements to reduce risk throughout the ASW kill chain." and the #1 PR11 Warfighting Science and Technology Gap: "Platform and system cost reduction."

Proposed bill and/or report language requested:

Provide \$3.0M in PE 0603747N, Undersea Warfare Advanced Technology, Project 2916 **only to continue SBIR N08-216 efforts required to provide a compact, single crystal vector sensor for technology insertion in the Deployable Autonomous Distributed System (DADS in FY-10).**

Please list industry, academic, and government partners:

Will this request be submitted to other Senate or House offices? If so, please list:

Yes, we intend to take this request to Congressman Rob Bishop and Senator Orin Hatch

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

TBD

Has funding previously been requested for this project?	No
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

Labor: \$1.35M Materials: \$1.35M Travel: \$300K

DoD or service program manager:		Dr. David Shifler			Phone:	
Office name:	Office of Naval Research			Email:		
Other DoD point of contact/advocate:					Phone:	
Office name:				Email:		

Purpose of project (limit to 250 words) and be as accurate and concise as possible-- this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

To produce aboard ship synthetic aviation fuel, a Fischer-Trope process uses readily available resources such as coal, power plant combustion products or on-board synthesized products, and converts them into syngas using electric power. Conversion of syngas to liquid fuel is a well-known chemical process. Future needs for the US military, the US Navy in particular, require extended missions, and capability to deploy in areas where fuel supply is inadequate or interrupted. On-board generation of aviation fuel using non-petroleum resources will allow the US Navy unprecedented mission capability. While electricity is available on board, limitations in supply and transport of logistic liquid fuel can severely impact the mission of aircraft carriers. This process provides a means for ships to be self-sustainable in their fuel needs. Key system advantages and superiority of this process include: a) onboard generation of logistic fuel; use of non-petroleum resources that are common and plentiful; use of available natural

resources at sea; and on-demand, uninterrupted liquid fuel supply for extended missions.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

N/A

Proposed bill and/or report language requested:

N/A

Please list industry, academic, and government partners:

Office of Naval Research

Will this request be submitted to other Senate or House offices? If so, please list:

Senator Hatch

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

Erik Raven (SAC-D Majority)

Brian Potts (SAC-D Minority)

Has funding previously been requested for this project?	Yes
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:
FY09	\$1,000,000
FY08	\$1,600,000
FY07	\$1,000,000

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

\$3,000,000 is requested to continue the design, development and fabrication of the synthetic fuel device. Project will take place at Ceramatec, Inc. in Salt Lake City, Utah.

Office name:	984 <sup>th</sup> CBSG, Ogden Air Logistics Center, Hill AFB		Email:			
Other DoD point of contact/advocate:					Phone:	
Office name:			Email:			

Purpose of project (limit to 250 words) and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

On July 15, 2007 an F-16 crashed on takeoff at Balad Air Base, Iraq. The Air Force incident report, attached, cited low tire pressure and maintenance data mishandling as the cause of the accident. The F-16 Landing Systems Group at Hill AFB has been exploring the Crane SmartStem solution to mitigate any future mishaps of a similar nature. Already implemented in the commercial marketplace, the project funding would provide for flight testing and demonstration of the solution on the F-16 platform. Implementation of SmarStem could yield

millions of dollars in annual savings to the Air Force through accident prevention and reduced maintenance costs.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

Other DoD point of contact/advocate:					Phone:	
Office name:	Air Force Reconnaissance Program Office (ASC/RA) and Air Force Space Command – Requirements Directorate (HQ AFSPC/DR)			Email:		

Purpose of project (limit to 250 words and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

CDL is successfully employed on all airborne ISR platforms, no operational capability exists to enable tactical operations of space-based ISR systems. Analysis of recent combat operations has identified a need to reduce the latency and increase the persistence of intelligence data from space-based systems to the combatant forces. Although programmed space ISR systems and Air Force responsive space operations (RSO) initiatives can provide critical intelligence in denied areas, these systems currently have no capability for in-theater tasking and down link. The addition of CDL to space-

based military ISR and commercial remote sensing platforms is a unique opportunity to add a low-cost, significant force-multiplier for our combatant Forces that was not included in the most recent budget cycle. With a space-based CDL system, in-theater tasking collaboration, collection and dissemination can take place real-time by the war fighter using the existing deployed CDL ground infrastructure to support multi-layered sensing and trusted sensor networks for air, space and cyber domains.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

This effort directly supports the recent Presidential Space Policy, which establishes guidance and implementation actions for commercial remote sensing space capabilities. A space-qualified CDL capability will have direct applicability to commercial platforms being developed under the National Geospatial Agency's \$1B NextView Program. CDL on commercial remote sensing platforms will enable direct connectivity to deployed US military ground terminals and significantly enhance the demand and utility of commercial data sources for military operations.

Proposed bill and/or report language requested:

Increase Operational Responsive Space Office, PE # 0604857F, Line 55 (09), by \$12.5M for Space Qualification of the Common Data Link program.

Please list industry, academic, and government partners:

Will this request be submitted to other Senate or House offices? If so, please list:

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

SAC D

Has funding previously been requested for this project?	Yes
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:
FY09	\$1.5M

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

--

## ADDENDUM

### Senator Robert F. Bennett Appropriation Disclosure Requirements Fiscal Year 2010

---

Under the new disclosure requirements announced at the beginning of the 111<sup>th</sup> Congress by the Senate and House Appropriations Committees, all Members of Congress are required to post on their websites each appropriations request they submit to the respective subcommittees. The information must include an explanation of the project, a justification for the request, and the requesting entity.

Senator Bennett is requiring any entity seeking federal funding to sign, date, and return this form to his office by April 6, 2009. By signing below, the requesting entity acknowledges that each Fiscal Year 2010 Appropriations Request form submitted to Senator Bennett's office, along with this addendum, will be posted on the senator's website in compliance with the new practice of the committee, and will therefore be available to the public. By signing this addendum, the requesting entity also acknowledges that the corresponding appropriations request is a priority for the city, county, council, or other organization that it represents. Each request will continue to be thoroughly reviewed by Senator Bennett's office and by the staff of the Appropriations Committee.

Going forward, Senator Bennett will continue to work to represent Utah's interests by ensuring Utah's priorities are adequately represented with congressionally directed spending.

Note: A signed addendum must be returned for each appropriations request submitted for Fiscal Year 2010.

Purpose of project (limit to 250 words) and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

Create a dynamic test and training capability that can be utilized by DoD intelligence assets to prepare warfighters for the environments encountered in the Global War on Terror.

Responding to the emerging threats related to the Global War on Terror requires the ability to rapidly design and procure capabilities that can be provided to the warfighter such that they can prevail against the enemies of our nation. Of equal importance is the ability to PREPARE and TRAIN our warfighters to utilize these technologies. This project will create an environment in which all facets of the ISR (intelligence, surveillance, reconnaissance) kill chain can engage in joint training and thus better prepare our airmen and soldiers for the

war effort BEFORE they deploy. The culmination of this project is to bring together the necessary technologies whereby we can test and evaluate tactics, techniques, and procedures that will be utilized to win the war on terror.

Currently there is no test range where this level of fidelity can be provided to the intelligence community in a time sensitive and cost effective manner. Without this capability, intelligence collection assets may be deployed that are potentially providing less than accurate data to the supported warfighter. Potentially allowing enemies of our nation to escape capture and/or harm our forces.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

U.S. Representative Walt Minnick- ID01

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

Chelsey P. Hickman, House Appropriations

Has funding previously been requested for this project?	Yes
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:
FY09- \$4.26M	No

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

A total of \$4.38 M is requested over a three year period.

FY10- \$2.56 M

FY11- \$913,100 k

FY12- \$913,00 k

After which time the United States Air Force will continue to fund the program.

## ADDENDUM

### Senator Robert F. Bennett Appropriation Disclosure Requirements Fiscal Year 2010

---

Under the new disclosure requirements announced at the beginning of the 111<sup>th</sup> Congress by the Senate and House Appropriations Committees, all Members of Congress are required to post on their websites each appropriations request they submit to the respective subcommittees. The information must include an explanation of the project, a justification for the request, and the requesting entity.

Senator Bennett is requiring any entity seeking federal funding to sign, date, and return this form to his office by April 6, 2009. By signing below, the requesting entity acknowledges that each Fiscal Year 2010 Appropriations Request form submitted to Senator Bennett's office, along with this addendum, will be posted on the senator's website in compliance with the new practice of the committee, and will therefore be available to the public. By signing this addendum, the requesting entity also acknowledges that the corresponding appropriations request is a priority for the city, county, council, or other organization that it represents. Each request will continue to be thoroughly reviewed by Senator Bennett's office and by the staff of the Appropriations Committee.

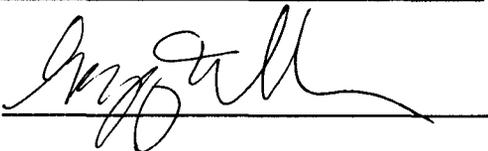

Going forward, Senator Bennett will continue to work to represent Utah's interests by ensuring Utah's priorities are adequately represented with congressionally directed spending.

Note: A signed addendum must be returned for **each appropriations request submitted** for Fiscal Year 2010.

Project Name: Tomahawk Cost Reduction Initiative

Head of the organization making request: Name: Gregg Williams

Title: President and Chief Executive Officer

Signature: 

Date: 25 March 2009

Other DoD point of contact/advocate:		Chip Guffy			Phone:		
Office name:	PMA 280			Email:			

Purpose of project (limit to 250 words) and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

The purpose of the continuation of this program is to pro actively insert new and affordable technology into the Tomahawk missile Williams International engine system to assure long term affordability, performance and reliability, leading to a more affordable missile system that meets the overall budget objectives.

This project will result in 20 heads at Ogden, Utah to implement improved manufacturing technologies. In addition, 20 equivalent heads high tech/high quality jobs in Michigan will be employed to perform studies, analyses and tests necessary to develop the technologies to maintain affordable systems.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

NA

Proposed bill and/or report language requested:

Please list industry, academic, and government partners:

US Navy, PMA 280, Tomahawk

Raytheon Missile Systems Co., Tucson, AZ

Will this request be submitted to other Senate or House offices? If so, please list:

Rep. Bishop, UT

Sen. Hatch, UT

Rep. Peters, MI

Rep. McCotter, MI

Sen. Levin, MI

Sen. Stabenow, MI

SASC

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

Rep. Bishop – Steve Peterson, HASC Advisor

Sen. Hatch – Bill Castle, Military Legislative Aide

Rep. Peters – Jonathan Smith, Defense Staff

Sen. Levin – Michael Noblet, Armed Services

Sen. Stabenow – Trevor Clarke, Defense Staff

SASC – Creighton, Senior SASC Staff

Has funding previously been requested for this project?	Yes
---	-----

If yes, please fill out the following table as far as applicable

Year and amount requested	Was funding provided? If so, amount:
2009 - \$7,600	\$1,700 – appropriated for the First Phase of this effort

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

The funding will be used at both Williams International facilities. Headquarters, Walled Lake, Michigan and Production facility in Ogden, Utah.

Is this a request for an appropriation, authorization, or both?		Both					
Proposed funding agency:		Defense Ammunition Center					
Account:	RDT&E			Budget line number [from DoD exhibit O-1, P-1, or R-1]:	41		
Line title:	Explosives Demil Technologies			Program Element number:	0603103A		
Is this project funded in the President's budget request? (Yes or No):				No	If yes, amount:	\$ 0	
Funding request:				<b>\$ 3.4M</b>			
Is the project in a Service Chief's Unfunded Priority or Unfunded Requirements List? (Yes or No):				no			
If yes, ranking:				Amount:			

DoD or service program manager:		Dr. Solim Kwak			Phone:		
Office name:	Defense Ammunition Center			Email:			
Other DoD point of contact/advocate:		Mr. Rick Nesbitt			Phone:		
Office name:	Tooele Army Depot			Email:			

Purpose of project (limit to 250 words and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

Tooele Army Depot (TEAD) has approximately 14,000 tons of excess munitions that must be demilitarized. It also has a sizable amount of explosives-contaminated scrap metal that must be decontaminated and large quantities of hazardous hydrolysate that must be properly treated. TEAD is committed to reducing its reliance on Open Burning and Open Detonating and is pursuing alternative eco-friendly technologies. The propellant to fertilizer technology is a safe, effective, and an environmentally protective **multipurpose** technology that should be used to reduce this stockpile and address the hazardous hydrolysate. Approximately \$3.4M is required to implement this program. \$2.2m was provided by Congress in FY07 to initiate the design, procure long lead equipment items and perform preparation work at TEAD.

The use of the R3 technology will provide a **multipurpose** solution for recycling of the propellants and explosives generated from demil operations, decontamination of explosives-contaminated scrap metal, and for the treatment of hazardous hydrolysate from CAD/PAD operations. It will also produce a beneficial byproduct while reducing TEAD reliance on burning the propellant.

Currently, there is a critical need to deal with not only the propellants and explosives that are produced from demil operations but also the more than 50,000 gallons of hazardous hydrolysate that is produced annually. This hydrolysate is currently treated offsite at a high cost and increased risk from spills during transportation and final disposal. With the partial funding of \$2.2M in FY07, the design and procurement of long lead equipment has already begun. However, without the additional \$3.4 million in FY10 the program cannot be implemented.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

no

Proposed bill and/or report language requested:

FY 10 Defense Appropriations bill

Please list industry, academic, and government partners:

Tooele Army Depot

Will this request be submitted to other Senate or House offices? If so, please list:

Yes, to Congressman Bishop's office

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

YES, Brain Potts—SAC-D

Has funding previously been requested for this project?	Yes, by appropriations
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:
FY 07; amount requested \$2.5M	Yes, \$2.2M

--	--

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

95% of funding will be spent at TOOELE Army Ammunition Depot - 5%in Virginia

Office name:	CNO OPNAV Staff N88		Email:			

Purpose of project (limit to 250 words and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

Starting in 2013, the new P-8A Poseidon will begin replacing the venerable P-3 Orion as the Navy's principle airborne Anti Submarine Warfare (ASW) platform. The P-3 is equipped with a magnetic sensor in its extended tail boom that detects the presence of large underwater metallic objects, such as submarines, when the aircraft flies over them a low altitude. For nearly 40 years, this Magnetic Anomaly Detection (MAD) has been very valuable for providing the location of a submarine with sufficient precision to

launch a torpedo attack.

The P-8A will not incorporate a MAD sensor and will operate predominately at high altitudes, well above MAD sensor ranges. This may challenge the aircrew's ability to obtain the location of a quiet diesel submarine, particularly in shallow water with the precision needed to launch an attack.

A series of SBIRs and basic research initiatives over the past five years have provided proven sensors and processors for both MAD and ELFE detections. Additionally, the ability to launch an Unmanned Air Vehicle (UAV) from a standard Navy sonobuoy tube has been successfully demonstrated.

The TRITON deployable ASW MAD Detection UAV initiative would consist of a feasibility study, prototype fabrication and airborne concept demonstration in advance of product test, evaluation and production. The results of this study can then be used to structure a follow on program that will restore the ability of airborne ASW platforms to exploit the magnetic and electric signatures generated by potentially hostile submarines.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

Yes, the requirement for the new P-8 Poseidon to conduct high altitude anti submarine warfare

Proposed bill and/or report language requested:

Line item entry in RDT&E, Navy

**Suggested Stub Entry**

RDT&E, Navy; Line 29; ASW Systems Development

- TRITON Deployable ASW Magnetic UAV Demonstration

+\$5,100

Please list industry, academic, and government partners:

Will this request be submitted to other Senate or House offices? If so, please list:

Yes, it has been submitted to Rep Chaffetz and Senator Hatch's Staffs

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

Yes, HAC-D Mr. Tim Prince and SAC-D Navy RDTE Pro Staff, Mr. Erik Raven

Has funding previously been requested for this project?	No
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

All revenue will go through the Salt Lake AST office. Approximately \$3.0 million will support engineering design and analysis along with test and evaluation accomplished in Utah. Approximately \$2.1 million will support subcontracted engineering and air vehicle tests in California.

ADDENDUM

Senator Robert F. Bennett Appropriation Disclosure Requirements  
Fiscal Year 2010

---

Under the new disclosure requirements announced at the beginning of the 111<sup>th</sup> Congress by the Senate and House Appropriations Committees, all Members of Congress are required to post on their websites each appropriations request they submit to the respective subcommittees. Purpose of project (limit to 250 words) and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

The program is focused upon development of youth ages 11-17, serving almost 9,000 Sea Cadets and adult volunteers in 387 units country-wide. It promotes interest and skill in seamanship and aviation and instills qualities that mold strong moral character in an anti-drug and anti-gang environment. Summer training onboard Navy and Coast Guard ships and shore stations is a challenging training ground for developing self-confidence and self-discipline, promotion of high standards of conduct and performance and a sense of teamwork. Funds will be utilized to “buy down” the out-of-pocket expenses for training to \$120/week. NSCC instills in every Cadet a sense of patriotism, courage and the foundation of personal honor. A significant percent of Cadets join the Armed Services often receiving accelerated advancement, or obtain commissions. The program has significance in assisting to promote the Navy and Coast Guard, particularly in those areas of the U.S where these Services have little presence.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

A significant percent of Cadets join the Armed Services directly from high school, often receiving accelerated advancement, or obtain commissions through college ROTC or the Service Academies. The program has significance in assisting to promote the Navy and Coast Guard, particularly in those areas of the U.S where these Services have little presence.

The officer and enlisted accessions related to this program are a significant asset to the Services: Over 2,000 ex-Sea Cadets enlist annually and an average of over 10% of USNA Midshipmen are ex-Cadets. Navy estimates that 2,000 out of an eligibility pool of 20,000 enlist in the Services annually.

Proposed bill and/or report language requested:

n/a

Please list industry, academic, and government partners:

U.S. Navy

U.S. Coast Guard

Navy League of the United States

Will this request be submitted to other Senate or House offices? If so, please list:

To date: Senators Chambliss, Gregg, Feinstein, Kennedy, Hitchenson, Boxer, Shelby, Sessions, Schumer, Snowe, Mikulski, Graham and Bennet have sent forms. Representatives Michaud, Sanchez, Hinchey, King, Wilson (Joe), Whittman, Granger, Hastings, Van Hollen, Stupack, Bishop, Holt, Dent, Calvert, Rothman, C. Brown, Oberstar, Ortiz, Bartlett, and Forbes.

Have, or will, committee staff be approached regarding this project? If so, please list staff member AND committee.

Senate & House Appropriations and Armed Services Committees

Has funding previously been requested for this project?	Yes
If yes, please fill out the following table as far as applicable	
Year and amount requested	Was funding provided? If so, amount:
2005 - \$2,000,000	Yes - \$1,700,000
2006 - \$300,000 (In addition to budget \$1,700,000)	Yes - \$300,000 (In addition to budget \$1,700,000)
2007 - \$300,000 (In addition to budget \$1,700,000)	Yes - \$300,000 (In addition to budget \$1,700,000)
2008 - \$300,000 (In addition to budget \$1,700,000)	Yes - \$300,000 (In addition to budget \$1,700,000)
2009 - \$300,000 (In addition to budget \$1,700,000)	Yes - \$300,000 (In addition to budget \$1,700,000)

Please provide a budget breakdown for the amount requested, including locations where funding will be spent:

All funds will be utilized to offset individual Cadets out-of-pocket costs for summer training to \$120/week in this Congressionally chartered program where Cadets are responsible for all program costs. Training will be conducted at Navy and military training sites across the U.S. and onboard Navy and Coast Guard ships.

Purpose of project (limit to 250 words and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

In order to assist the Army National Guard (ARNG) in providing training to soldiers, the addition of a third three-man regional training team will enable the ARNG to support an increasing volume of requests for artillery training in the western region. This is a one-time request that has the full support of the Product Director, Fire Support Command and Control Family. The existing two regional training teams have already proven their

ability to increase readiness and decrease post-mobilization training time.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

**ADDENDUM****Senator Robert F. Bennett Appropriation Disclosure Requirements  
Fiscal Year 2010**

---

Under the new disclosure requirements announced at the beginning of the 111<sup>th</sup> Congress by the Senate and House Appropriations Committees, all Members of Congress are required to post on their websites each appropriations request they submit to the respective subcommittees. The information must include an explanation of the project, a justification for the request, and the requesting entity.

Senator Bennett is requiring any entity seeking federal funding to sign, date, and return this form to his office by April 6, 2009. By signing below, the requesting entity acknowledges that each Fiscal Year 2010 Appropriations Request form submitted to Senator Bennett's office, along with this addendum, will be posted on the senator's website in compliance with the new practice of the committee, and will therefore be available to the public. By signing this addendum, the requesting entity also acknowledges that the corresponding appropriations request is a priority for the city, county, council, or other organization that it represents. Each request will continue to be thoroughly reviewed by Senator Bennett's office and by the staff of the Appropriations Committee.

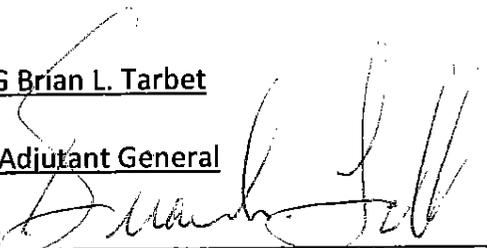

Going forward, Senator Bennett will continue to work to represent Utah's interests by ensuring Utah's priorities are adequately represented with congressionally directed spending.

Note: A signed addendum must be returned for **each appropriations request submitted** for Fiscal Year 2010.

Project Name: Senior Scout Electrical Optical Infra-red Capability

Head of the organization making request: Name: MG Brian L. Tarbet

Title: The Adjutant General

Signature: 

Date: 11 May 09

Office name:	Email:					

Purpose of project (limit to 250 words and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

By incorporating an imagery capability into the Senior Scout system, the platform will be able to accomplish the existing SIGINT mission while adding the additional dimension inherent in the IMINT domain. The platform is already implementing the Ku Beyond Line of Sight data link that is utilized by the Predator program. This data link has a video mode that will allow the Senior Scout platform to disseminate the collected imagery off

the platform. The Senior Scout Electrical Optical Infra-red Capability will enhance the mission of the Senior Scout without requiring support from an independent imagery platform. Operational costs will be reduced by having a single platform that can accomplish this multi-INT role. This will result in an increase in actionable intelligence data and a more timely response to adversary threats.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

Purpose of project (limit to 250 words) and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

The implementation of a Line of Sight (LOS) data link capability on the Senior Scout platform will greatly increase the bandwidth available for information dissemination to and from the platform. The LOS upgrade to the Senior Scout platform will encompass four specific technical areas; LOS modem upgrades, airborne LOS antenna integration, ground LOS terminal and common infrastructure tasks. The existing BLOS capability on

the Senior Scout platform allows the upgrade to the LOS capability with a minimum of additional effort.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

Purpose of project (limit to 250 words and be as accurate and concise as possible— this language will be shared with the Senate Appropriations Committee. You may also submit a separate white paper with more detail on the project):

The Senior Scout Remote Processing Capability will develop the necessary remote processing functionality and integrate these capabilities into the Senior Scout system. This includes the necessary engineering for system design, implementation, integration, verification, accreditation support and documentation. The addition of remote processing capabilities to the Senior Scout platform will enhance the mission and

increase the amount of data that can be exploited by the platform. This upgrade will leverage enhanced data link capabilities currently being added to the platform. This will result in an increase in actionable intelligence data, a more timely response to adversary threats and a mitigation of current Host Nation Operator security concerns.

Does the request meet an official DoD or service requirement? If so, cite official requirement documents and attach copies if available.

2006			
<b>Federal Agency Advocate (name, office, e-mail and phone number):</b>			
<b>State Agency Advocate (name, office, e-mail and phone number):</b>			

**One Sentence Statement of Purpose for the Project.**

To **honor and recognize** the service of each individual Servicemembers with the presentation of their personalized Unit historical and current record of service as a legacy tool they can share with family for generations; to **educate the public** through presentation of same historical records for hands-on use to each school in the state, each media outlet, and every legislative representative.

**Detailed Description the Project.**

*If you wish, you may submit a separate white paper with additional details.*

- **The Army Historical Program written by the Center for the Military History states, "Educating the soldier on the value and utility of history is vital to the future of the Army."** And yet there is no standardized, organized program for distributing the histories and public affairs content that is already being collected to the Servicemembers themselves. Historians and Public Affairs Officers submit vast amounts of content to their respective headquarters with few people ever seeing their content, in fact, the Army Historical Program readily admits that they do not have the manpower to even read most of what is submitted for archiving.
- Further, Plus, there is no recognition tool being given to the Servicemember that is relevant to their actual service in terms of what they did, who they served with, what objectives were met, what sacrifices were made both in theater and at home, etc. Some currently receive a flag, coin and medal but no record of service.
- There is no strategic communication tool at the grassroots level currently in existence that allows the Servicemember to easily,

proudly and eagerly, tell their Unit's story. For most families and communities, the story they hear comes from the media outlets. By providing each Servicemember with a unit-specific historical record that is relevant and meaningful, they have a vehicle to share their experience and ultimately, reinforce the importance of why they signed up in the first place—which has been shown to encourage reenlistment.

**Proposed solution:**

Military Units should organize and integrate collected content from both the Historian and the Public Affairs offices (photos, videos, documents, text, honors, newsletters, rosters, bios, etc.) into an interactive (most cost effective) "record of service" to be given each Servicemember in recognition of their Service on an annual basis, and as a communication tool to help them share their experience with family and friends as a means to strengthen understanding and support for the US Military. A "master" copy from each Unit should be submitted to each Branch historical and public affairs department for their archives, as well as to the National Archives, Center for Military History and the Library of Congress.

**State Exactly How the FY10 Funds would be Allocated.**

The National Guard Bureau would be accepting the funds, attached to the G-1 office, Col. Marianne Watson

**Justification for the Use of Taxpayer Funds for the Project.**

**BILL: Place ROI here that I sent you?**

This is a cost-effective, grass-roots means to assist with retention in preserving America's all-volunteer military force. The project pays for itself if 4 out of 10,000 are positively encouraged to reenlist because of the pride and morale derived from this record of service.

**ADDENDUM**

**Senator Robert F. Bennett Appropriation Disclosure Requirements  
Fiscal Year 2010**

---

Under the new disclosure requirements announced at the beginning of the 111<sup>th</sup> Congress by the Senate and House Appropriations Committees, all Members of Congress are required to post on their websites each appropriations request they submit to the respective subcommittees. The information must include an explanation of the project, a justification for the request, and the requesting entity.

2008			
2007			
2006			
<b>Federal Agency Advocate (name, office, e-mail and phone number):</b>	Mr. Keith Siniscalchi, Acting Deputy to the Commander, Department of the Army, SJMTE-CO, 1 Tooele Army Depot, Bldg. 1 Tooele, Utah 84074-5000,		
<b>State Agency Advocate (name, office, e-mail and phone number):</b>			

**One Sentence Statement of Purpose for the Project.**

The project has an indirect impact for deployed warfighters in that it will free up critical munitions storage capacity at Tooele Army Depot allowing for more effective power projection of munitions to the warfighter in theater.

**Detailed Description the Project.**

*If you wish, you may submit a separate white paper with additional details.*

The work proposed for FY10 would build on the initial test knowledge gained during FY09. Battelle would work with depot personnel to produce a complete engineering package comprised of system drawings, equipment specifications and other detailed documentation needed for system fabrication. A prototype acid dissolution system would be built. While tailored to handle the CADs and PADs, the system will also include sufficient flexibility to accommodate additional high priority items. The unit will be a fully functional. treatment system for demonstration of on site ammunition disposal capabilities.

**State Exactly How the FY10 Funds would be Allocated.**

**Proposed Phase 2 Activities (FY10):** Utilize FY09 test results to develop a full detailed prototype design : Team Battelle and Tooele Army Depot resources to produce a complete engineering package; Equipment specifications, system fabrication drawings, operating procedures ; Build prototype system in preparation for Phase 3 installation and demonstration.

**Justification for the Use of Taxpayer Funds for the Project.**

Innovative conventional ammunition demilitarization technology is a growth industry; New, environmentally friendly techniques are needed to dispose higher risk munitions; Tooele Army Depot's mission, infrastructure and personnel expertise make it ideal as a sustainable center for DOD conventional demilitarization support ; Ammunition storage, maintenance, demilitarization ammunition peculiar equipment; Battelle's ADP is well suited for handling multiple munition types and quantities; Battelle's High Energy Research Laboratory (HERLA); Multi-purpose research facility with the largest privately-owned blast containment facility in the U.S; Platform for further ADP ammunition applications development; As an existing corporate presence in Tooele County, Battelle is well postured to support sustainable Tooele Army Depot growth.
